Minimum basin bowl depth	100 mm
Warranty	2 years

Installation planning and equipment

System includes the 3-in-1 tap, dispensing system with 3 L reservoir, hand dryer and power supply unit. Provide space for hoses and modules, with access for servicing and soap refilling. Position all three operating zones over the basin. A 1/2-inch water mixer is available separately.

Data scope: based on current catalogue descriptions for the wall-mounted versions and the chrome variant drawing. Concealed installation depth, wall opening diameter, module dimensions, water flow rate, soap dose and noise level are not specified in the available documentation. Confirm these before building the enclosure. This sheet does not replace the installation manual.
